

# What's New in Filr?

New Features in 2024

Robin Redgrave  
Solutions Consultant

# Filr – Entitlements

Following is included with Filr purchase

- Unlimited external users (additional license required for MFA with external users)
- Content Editor (with Filr Advanced)

Following products are available with active Filr maintenance

- Advanced Authentication Limited (with Filr Advanced)
  - Provides MFA, typically Email OTP, SMS OTP, TOTP

# Four Releases a Year

Named after the year and the quarter

- ie 24.1, 24.2, 24.3 and 24.4

The .4 release is for 3 years support

- The others are 1 year support

All releases have defect fixes and platform updates

ie Tomcat, Collabora, Angular etc

Maybe minor releases as well

Such as 24.4.1

# OpenText Filr

Version 24.1

## GroupWise Attachments in Filr

- Rebranded Mail configuration in Filr Administration
- Send GroupWise attachments as a Filr link instead of a file
- Send files in My Files, Net Folders, or Shared With Me area as a Filr link in a GroupWise mail

## Monitor Filr with Prometheus and Grafana

- Monitor system metrics Filr, Search, and Postgres Appliances

## Standby Database Appliance

- Two PostgreSQL appliances with one acting as a standby
- Real time replication

### Outlook and GroupWise Settings

☒

Enable Filr for Outlook and GroupWise

#### Policy and Permissions

☒

Allow download of email attachments without authentication

☐

Allow user to define the policy ⓘ

#### Attachment management

☐

Allow user to modify the policy limits ⓘ

Send attachments using Filr

☒

Always

☐

File size exceeds  MB

Attachment link expires after

☒

 days

☐

 downloads

#### Delete Mail attachments from Filr

☒

Expired attachments

☐

Attachments older than  days

Delete attachments

# OpenText Filr

Version 24.2

## Password Protected share links

- Administrative options to enable
- Supported on the Filr Web Client, Windows Desktop Client, and Filr Mobile Clients
- Option added to share link dialog

## Improved security

- Added TLS 1.3 support

### Share Link

 Biweekly\_timeSheet1.xlsx

---

**Any user with this link can:**

☒ View file

☐ Download file

**Access to link will expire:**

☐ Never

☐ On

☒ After  days

☒ Secure this link ⓘ

Password

✗ Can have 8-64 characters

✓ Cannot contain the user's first name, last name

✗ Must fulfill any three of the following criteria: at least one uppercase character, at least one lowercase character, and at least one special character

**CANCEL** **GENERATE**

# OpenText Filr

Version 24.3

## Extended collaboration

- Auto provision external users in Filr from any LDAP source
  - Disable lookup for external users
  - Manage external Filr users' credentials in LDAP source – password policies, change password, etc.
- External user badge/icon – share dialog, user list
- Provision data from SharePoint 2019

## Simplified Administration

- Deploy Filr with vashare on NSS (or NSS AD) over CIFS

# OpenText Filr

Version 24.4

## Data leak prevention

- New policies to Warn or Block users when sharing sensitive files
- Automate detection and classification of sensitive files using IDOL
- Extend/add APIs to support new capabilities (IDOL uses APIs)

## External user registration

- Phone number requirement (MFA and regulations such as GDPR)

## Encryption of Filr Server to Search Appliance communication

- Certificates need importing and it needs enabling in .properties files

Move Operation is allowed in Shared With Me

# OpenText Filr

Roadmaps are subject to change and are therefore not a commitment to deliver a software product, code or functionality or to meet any specific timetable.

Top  
Innovations:

- 1. Interoperability – Integrate with O365 suite (Entra ID, SharePoint Online, Teams) and other OpenText products
- 2. New platform – Delivering Filr services on the next SLES code base (SLES 15 SP7\*)
- 3. Advanced security – Protect and collaborate on sensitive files

	 Q4 CY2024 v25.2 in progress	 Q1 CY2025 v25.3 planned	 Q2 CY2025 v25.4 targeted	 Q3 CY2025 v26.1 targeted
